

Pond Keeper[®]

BARLEY STRAW EXTRACT

Specifically Formulated for Ponds, Water Gardens and Fountains for Improved Water Clarity and Water Health

BENEFITS

- Easy to use
- All natural
- Creates a clean clear pond
- Eliminates barley bales, pellets and loose straw
- Can be used year round
- Safe for fish, pets and people.

Our barley straw extract is an all natural liquid formulation derived from a fermentation process using barley straw, which helps keep pond water clean and clear all season long.

Pond Keeper Barley Straw Extract eliminates the need for unsightly barley bales, barley straw and barley pellets, while also eliminating the standard length of time it takes the barley straw to biodegrade and take effect.

Pond Keeper Barley Straw Extract is compatible with all other Pond Keeper products and can be greatly enhanced by Pond Keeper beneficial bacteria.

Available in 16 oz. and 32 oz. containers.
